

Executive Footpath Sign

confidence is buying quality

- Does not distort or breakdown. Colour stable even in high UV areas
- Standard panel size of 800mm x 600mm (larger panels are available on request).
- High quality ACM, with or without handle cut out.
- High quality rotational moulded polyethylene base
- Interchangeable & reversible sign panels
- Suitable for screen or direct printing, digital print films & cut lettering
- Stable in high wind environments when weighted correctly
- Base can be partially filled with water or sand for additional stability, and can be supplied with wheels so they can be easily moved
- Panels lock into place
- Fourteen standard colours available, and custom colours on request (subject to MOQ)
- Panels can be customised in profile cut designs & shapes and corporate logos can be moulded into the base
- Meets NZ local authority requirements and council bylaws.
- 12 month guarantee

*Custom colours available, subject to minimum order quantities

Proven in New Zealand conditions for over 20 years, our products are manufactured locally using ISO 9000 rated materials.

All signs are rotationally moulded & designed specifically so that the base and panel flex together under high wind loadings, ensuring complete stability.

The polyethylene plastic used in bases is extremely hard wearing, allowing for long life and high performance. Aluminium composite panels ensure UV & temperature stability even with dark graphics.

Our most economical footpath sign, highly durable with rectangular base.
